The Interdisciplinary Honors Program at Chestnut Hill College challenges students to pursue a creative approach to the liberal arts. The Program offers team-taught interdisciplinary seminars that promote liberal education by stressing interconnections among different fields of study and by encouraging students and faculty alike to teach and to learn.

THE HONORS LEARNING EXPERIENCE

This reading- and writing-intensive Honors Program is an interdisciplinary learning experience in a group context. Students are encouraged to learn not only from the faculty but also from each other and from their independent studies. The Program allows faculty the opportunity for creative course structuring and collaboration with colleagues from other departments.

To achieve the desired integration of different disciplines into a unified whole, the Program focuses on the interdisciplinary character of the learning experience rather than on individual academic fields. Since faculty from at least two academic departments cooperate in teaching each seminar, the Program offers a learning experience which crosses department lines and which exemplifies the unifying and integrating experience that is the purpose of a liberal education.

Although the content of Honors seminars is considerably more demanding than the content of most introductory courses, these seminars are designed for the inexperienced student and so cannot achieve the depth of upper-level courses for majors. Ideally, the Honors seminar leads the student gradually to a mastery of methodology and a consideration of advanced topics, aiming always at the integration of the student's learning experiences. Faculty provide background information and instruction in methodology as needed.
STRUCTURE OF THE PROGRAM

The Interdisciplinary Honors Program is ordinarily a sequence of three six-credit, two-semester seminars. In addition, Honors students take HONU 200, Writing in the Disciplines, in the fall semester of their first year. Students not in the Honors Program who would like to take a specific seminar may contact the Director; however, preference is given to students pursuing the complete program.

DURING 2009-2010 ACADEMIC YEAR, THE INTERDISCIPLINARY HONORS PROGRAM IS OFFERING THE FOLLOWING COURSES:

**HONU 200 WRITING IN THE DISCIPLINES**

An introduction to writing in a range of disciplines. In addition, group dynamics and discussion, as well as the structure and methodology of the Interdisciplinary Honors Program, will also be addressed.

**HONU 324-325 MUSIC AND THE MIND: THE PSYCHOLOGY OF MUSIC**

This course explores current research in the field of cognitive science regarding how the mind functions during the experience of music—what one thinks about music, how one thinks about music, and why one thinks a particular way about music. This course will focus on information gathered from such diverse disciplines as psychology, philosophy, neuroscience, history, music, sociology and anthropology.

**HONU 326-327 THE EMERGENCE OF THE HERO IN THE EPIC VOYAGE: QUESTS IN RELIGION, SCIENCE, AND THE FANTASTIC**

This course traces the hero’s search for personal excellence using Homer’s Odyssey as a conduit for the study of modern works of fantasy and science fiction. Students will be challenged to analyze the philosophical and religious foundations established in specific novels and films and analyze their own personal responses to the ideas presented. Students will concurrently study the scientific discoveries and principles that contribute to the fictional works and explore the interplay between science-directed fiction and fiction predicting scientific discovery.

**HONU 328-329 WRITTEN IN STONE**

Since the earliest days of civilization, humans have endeavored to leave a permanent record of their existence. Thus they would immortalize their lives and times. They chose to send future generations these messages in the most permanent material they could find: stone. In this course students will explore the significance of these monuments through their reflections in art and literature.
THE PLACE OF THE HONORS PROGRAM IN THE CURRICULUM

The full Interdisciplinary Honors Program consists of 21 credits: the three-credit Introduction to the Honors Program (HONU 200) and three two-semester Honors seminars. Completion of the Program fulfills the following elements of the core curriculum: all of the Ways of Knowing courses except the two in Scientific Perspectives, the core seminars ILAU 101 and GSU 201, and College Writing. For seminars which include a religious studies or scientific component, that seminar may be substituted for one of the two courses required in that area; in this case, an additional Ways of Knowing course is required. An advantage of this program is that fewer credits than usual are required to fulfill the core requirements of the College.

Students who complete only a part of the Honors Program must satisfy all degree requirements as described in the college catalog, and must therefore match their credits in Honors seminars with those of the core curriculum.

Students may apply credits earned for Honors seminars toward their major field of study or toward a minor at the discretion of the faculty conducting the seminar in consultation with the faculty of the department of the major or minor. Students wishing to apply credits for Honors seminars toward a major or minor should consult the Director of the Honors Program.

SELECTION OF COURSE OFFERINGS

To ensure fresh and appealing choices for all students in the Program, each Honors seminar is offered for a maximum of three years, and seminars are rotated on a regular basis. Honors seminars may be offered by any faculty member with at least one year of full-time teaching experience at Chestnut Hill College.

STRUCTURE OF SEMINARS

Approximate Honors seminar size is twelve students and two faculty members. Meetings are conducted primarily by group discussion, but all types of experience and activity are included as appropriate—lectures, demonstrations, field trips, audiovisual experiences and more. These are always oriented toward growth in interdisciplinary understanding, discussion, and writing. Performance in discussion and writing is emphasized equally in assigning grades.

Most Honors seminars meet regularly for a two-hour session once a week. In addition, an unscheduled third hour each week is available as needed; when this hour is used, the entire seminar group decides the scheduling. The use of this hour may vary to suit the content or the approach of individual seminars and faculty.

In Honors seminars students are encouraged to learn in an active, independent, and open-ended atmosphere. There are no formal tests or examinations. Evaluation of the students’ work in each Honors seminar is communicated to them through interviews scheduled twice a semester. At these interviews, held one-third and two-thirds through each semester, the student and both faculty members from an Honors seminar discuss the student’s participation, level of performance, and progress.
GRADING POLICY

The Interdisciplinary Honors Program provides a dynamic learning situation which fosters growth through interaction of persons and sharing of ideas. Competition for grades is strongly discouraged; the members of each seminar, faculty and students, work to establish an atmosphere of collaborative learning.

The invitation to participate in the Honors Program is an expression of confidence in the student’s ability to achieve a high level of academic performance. However, enrollment in the Program is no guarantee of high grades. Honors students are expected to earn a “B” grade or higher in each Honors course.

When a student earns a grade below a “B” in an Honors course, the Director of the Program will consult with the Honors Program faculty and with the student to ascertain whether it is in the best interest of the student and the Honors Program that the student continue in the Program. However, first-year students will not be dropped from the Program after the first semester because of grades.

THE LUMINOUS REVIEW

The Luminous Review, sponsored by the Interdisciplinary Honors Program, is an annual journal of academic work by Chestnut Hill College students. Any Chestnut Hill College student may submit a paper; however, only Honors Program students may sit on the Editorial Board.
ADMISSION TO THE PROGRAM

Participants in the Interdisciplinary Honors Program are selected from among qualified and interested applicants to the college. Selection is based on the applicant’s interest in the Program, test scores, high school record, writing sample, and personal interview. Only a limited number of students can be accepted each year. Because special enthusiasm and a variety of viewpoints are needed to facilitate learning through discussion, it is not necessarily applicants who rank highest academically who are admitted into the Honors group.

THESE STEPS ARE REQUIRED OF APPLICANTS TO THE COLLEGE WHO WISH TO APPLY FOR ADMISSION TO THE INTERDISCIPLINARY HONORS PROGRAM:

• A completed application to Chestnut Hill College; directions and application forms are available from the Admissions Office.

• A letter to the Director of the Honors Program which states the student’s reasons for wishing to participate, the contributions s/he feels s/he can make to the Program, and the ways in which the Honors Program will help him/her to attain his/her educational goals.

• A visit to campus and personal interview with the Director of the Program; if necessary, telephone interviews may be arranged. If students wish to stay overnight on campus, they should contact the Admissions Office.

Applications received by early April will be given full consideration.
